FEDERAL COMMUNICATIONS COMMISSION WASHINGTON, D.C. 20554

FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY
THE SECRETARY - ROOM 222

2 APR 1993

IN REPLY REFER TO:

7330-7/1700A3

Honorable Nancy Landon Kassebaum United States Senate Washington, D.C. 20510

Dear Senator Kassebaum:

This is in reply to your letter of March 17, 1993, in which you inquired on behalf of several of your constituents regarding the Notice of Proposed Rule Making (Notice) in PR Docket No. 92-235, 57 FR 54034 (1992). This Notice proposes comprehensive changes to the Commission's Rules governing the private land mobile radio services operating in the frequency bands below 512 MHz.

Your constituents are specifically concerned about the impact of these changes on radio control (R/C) hobby users. Enclosed is a discussion paper concerning our proposals for the 72-76 MHz band. In short, we expect there would be no adverse impact on R/C operations because of any proposal contained in the Notice.

We are, of course, sensitive to the concerns of both users of private land mobile radio spectrum and R/C hobbyists. We will, therefore, take your constituents' concerns into account when we develop final rules in this proceeding. As indicated in the <u>Notice</u>, we remain convinced that without significant regulatory change in radio operations in the bands below 512 MHz, the quality of communications in the private land mobile radio services will continue to deteriorate to the point of endangering public safety and the national economy.

We want to thank you for your interest in this proceeding. Your constituents' letters will be included in the record of the proceeding. We expect final rules to be issued in 1994.

Sincerely,

Richard J. Shiben

Chief, Land Mobile & Microwave Division

Office of Secretary Donna Searcy Federal Communications Commission Room 222 1919 M Street, N.W. Washington, D.C. 20554

Dear Secretary Searcy:

Re: PR Docket 92-235

Enclosed are letters I have received from constituents wishing to comment on the proposed revisions to the Private Land Mobile Radio Services (PR Docket 92-235). I respectfully ask that these letters be made a part of the record.

Warmest regards,

Nancy Landon Kassebaum United States Senator

NLK:dw Enclosures The Honorable Nancy Kassebaum 155 N. Market Wichita, Ks. 67202

Dear Senator Kassebaum:

I am a twelve year military pilot and I also am very involved two local clubs whose members enjoy constructing and operating radio controlled model aircraft.

I am very concerned about proposed rules that are currently under consideration by the Federal Communications Commission (FCC). The proceeding is PR Docket 92-235. If adopted, the new rules will greatly reduce the usability of frequencies currently assigned for model use and increase the risk of accidents and attendant liability for controlling model aircraft.

Our radio control frequencies are in the 72-76 MHz band. This band is primarily used for private land mobile dispatch operations. However, our radio control frequencies in this band are far enough apart from the land mobile frequencies that we have been able to share the band without either use interfering with the other.

Now the FCC wants to create more land mobile frequencies by splitting them into narrower bandwidths and rearranging the band plan. As a result, many land mobile frequencies will move closer to the radio control frequencies and cause interference to radio control operations. I an told that of the 50 frequencies that are presently available for radio control of model aircraft only 19 will be left if these new rules are adopted.

When we fly our model airplanes under radio control, we go to great lengths to assure the safety of the operators and bystanders and the protection of property. Many of our safety precautions involve the careful coordination and use of the radio control frequencies. If the number of usable frequencies is diminished as proposed by the FCC, the remaining frequencies will become congested and the margin of safety will be greatly decreased.

Please understand that many model aircraft have wing spans up to 10 feet and weigh as much as 30 or 40 pounds. The models

the operating conditions of land mobile radio users at the expense of radio control modelers. The FCC may not think we are as important as business users of radios, but we have a considerable investment in our models and in our radio equipment. The hobby provides many hours of enjoyment to thousands of people like myself and contributes to the advancement and development of the commercial aviation industry.

Please help me continue the safe enjoyment of my pastime by not allowing the FCC to carry out its proposals for the 72-76 MHz band.

Sincerely,

Tom & Virgie Ames 915 Toh-n-hah Ct. Wichita, KS 67212
